Results of a fire extinguishing test referring to ICAO Airport services manual, part 1, chapter 8, fourth edition, 2015, using simulated sea water
Foam concentrate STHAMEX MARINE 3% F-20 #9372

Dear Sir or Madam

Corresponding to your order we have carried out on 2023-05-08 a fire extinguishing test referring to clause 8.1.8 of the above standard, using the foam concentrate STHAMEX MARINE 3% F-20 #9372 (3% usage concentration) of the manufacturer Fabrik chemischer Präparate von Dr. Richard Sthamer GmbH & Co. KG.

The test was carried out largely in accordance with the specifications of clause 8.1.8 of the above standard, performance class B. The deviations in the test procedures are listed below:

- The foam solution was prepared with simulated seawater according to EN 1568:2018.

Herewith we confirm the obtained test results as follows:

ICAO performance class B requirements were fulfilled using a 3% foam solution with artificial seawater.

The extinguishing test referring to clause 8.1.8 of ICAO Airport services manual, part 1, chapter 8, fourth edition, 2015 is a partial test only and not representative of a complete type test of the foam concentrate. The use of simulated seawater is a special case, which is not covered by a type test according to the above standard.

Best regards

Grad Eng. Holger Romberg
Laboratory Manager
