EQUIPMENT:

Equipment and systems covered by this certificate are as follows:

The L6-Ex and L6A-Ex are illuminating life jacket safety devices designed for use when the wearer enters the water. The difference between the two models is the method in which the unit is activated, the L6-Ex utilises a pull ring whilst the L6A-Ex has a water activated switch.

The equipment comprises of a printed circuit board, a lithium battery, a light emitting diode and in the case of the L6-Ex a reed switch. The enclosure for the device is comprised of two plastic parts. The electronics within the housing is encapsulated in epoxy resin. The battery used in the device is not replaceable and non rechargeable.

Intrinsic safety is maintained by the limitation of current, power, inductance and capacitance and the use of specified batteries.

The following battery types are permitted:

Panasonic CR-2/3A

Able CR123A

CONDITIONS OF CERTIFICATION: YES as shown below:

The L6-Ex and L6A-Ex are housed within plastic enclosures, and may be susceptible to electrostatic charging.
